

"Lighthouse Nan" Accorded Success

The Knox Players again proved very popular with the public when they presented their play, "Lighthouse Nan," to a crowded house Wednesday evening last.

The play was a melodrama of the old school plentifully interspersed with comedy. The stellar role of "Nan" was cleverly taken by Dorothy Ranton, while Mrs. D. Edwards and Dave Jenkins as Moll and Ichabod Buzz-r. brought roars of laughter with their comedy.

The supporting parts were all ably taken, and the play generally well earned the plaudits of the audience. The Sailors' Chorus by members of the High School Choral Society added a delightful musical touch to the theme of the play.

Besides the artistes, Mrs. Lex Wallace, director, is to be complimented on the presentation of so splendid a performance.

The stage settings and scenery, which had been painted locally, were very effective, while the vehicle drawn by the elusive "January" caused lots of merriment.

The following was the dramatic personnel:

Mr. Enlow, wealthy business man
Al Thomas
Ned, young city chap, Nan's lover
Lex Wallace
Ichabod, the lighthouse keeper
Dave Jenkins
Moll Buzz-r, his wife
Mrs. D. Edwards
Nan, their supposed grandchild
Dorothy Ranton
Sir Arthur, an English nobleman
John Goertz
Sarah, his sister
Mary Parrott
Hortense, John Enlow's daughter
Marvel McCoy
Injun Jim, the villain
Ed Wallace

The Knox Players wish to thank those who loaned the various stage settings and all those who helped in any way to make the play a success.

Where Price and Quality Meet

Mt. View M.D. Re-elect Reeve

Percy Saunders was re-elected Reeve for a second term at the organization meeting of Mountain View municipal district held at Olds on Saturday last, and Councillor J. A. Dodd was appointed Deputy Reeve. C. E. Reiber was appointed Auditor, and Councillor Flinn was appointed Representative to the next Board meeting which is being held in Calgary this week. Each councillor was appointed a committee of one to take care of the indigent relief in his own division.

Rates of pay of labor for the year were set at: Single Man 35c hour, Man and Team 45c, Man and Four Horses 60c, Overseer 45c, Farm Tractors 15 80 \$1.50 per hour, Larger Tractors \$1.75 per hour.

Rate of pay of councillors for meetings and supervision was set at \$4.00 per day and 10c per mile.

The necessary by-law was passed regarding seed grain relief, but the secretary reported that no application forms had yet been received from the Provincial Government.

A letter was read from the Department stating that the triennial assessment which was to have been made this year, had been postponed and that the present assessment would still be in effect.

The secretary was instructed to attend meetings of the Board of Review in Calgary when three local cases would be heard under the Farmers' Credit Arrangement Act.

It was decided that distribution of gopher poison would be made on the same lines as last year, and arrangements are being made with the dealers whereby the municipality will supply a similar amount of gopher poison to that purchased by any farmer within the municipality.

A report was received of a transient relief case in Edmonton which had been in dispute for some months, the court finally declaring the case chargeable to the province.

The usual resolution was passed with regard to the signing of cheques and a by-law was passed to enable the necessary financing for the year.

It was decided to put the tractor in shape for the year's work and the men were instructed to take it to Calgary for repairs.

Councillor Rupp and Mrs. Rupp were appointed members to the Didsbury Hospital Board, and Councillor Trimble and Mrs. L. Hammer were appointed to the Olds Hospital Board.

East Telephone Co. Annual Meeting

Didsbury East Mutual Telephone Co. Ltd. held its annual meeting on March 6th, with President Arden Deadrick in the chair.

J. W. Rupp, secretary-treasurer, presented his statement and reported that there was enough money on hand to meet the final payment to the provincial government, due on the 1st of April.

A decision was made to reduce the monthly rental from \$1.90 to \$1.75.

Messrs. N. Swalm and C. Dickau were elected to the board of directors. Mr. Harry Reiber was elected assistant secretary-treasurer and Mr. L. Dickau was again appointed as lineman.

If in need of Harness or Repair Parts, we can supply your wants at lowest prices.—T. E. Scott.

Good Friday a Holiday.

Good Friday, March 26th, being an official holiday, the Didsbury stores will be closed. They will, however, be open on Wednesday afternoon, March 24th.

U.F.A. Annual Meeting.

The annual meeting of Didsbury U.F.A. was held on Friday last in W. Gillrie's livestock office.

Election of officers resulted as follows:

Roy McNaughton, President.
J. McDougall, Vice-President.
W. J. Scheidt, Sec.-Treas.

Directors elected were: Messrs. N. S. Clarke, Chas. Dickau, W. J. McCoy, F. Jackson, J. Worthington, Hugh McLean, Theo. Reist, George Burns, E. St. Clair and N. Swalm.

Mr. J. W. Brown gave his report of the annual convention which was held in Calgary. He stated that a warm feeling of fellowship and tolerance was expressed by the delegates in the future policy of the U.F.A.

The meeting was very enthusiastic as regards the standing of the new forward movement. The secretary reported that many old members were returning to the fold. He said that prospects were very bright for a very successful year.

Will Organize To Celebrate Coronation

At a meeting of the town council Monday night Mayor Chambers and Councillors Spence, Reiber and Gooder were appointed to organize a committee to consider the celebration of the Coronation on May 12th.

A meeting will be called for Tuesday, March 30th at the public school when the various organizations in the town are asked to attend.

Obituary.

MRS. O. W. STAUFFER

Another of the oldtimers of the Didsbury district passed away on Friday, March 11th, when Mrs. O. W. Stauffer died in the Didsbury General Hospital.

Sybilta Weber was born at St. Jacob's, Ontario, on May 12th, 1874. Shortly after her marriage to Mr. Oliver W. Stauffer on February 12th, 1901, they came to Didsbury and resided on their homestead 4½ miles west until January, 1932, when they moved to town and where they resided until the time of her death.

She was converted in March, 1926, and joined the M.B.C. Church, of which she remained a faithful member until the time of her departure.

Her husband and family of six children remain to mourn her loss. Two daughters: Mrs. Otto Lemke of Acadia Valley, Alta., and Mrs. J. V. Schaler of Lindale, Alta.; four sons: Ira, Loyd and Lester, who with their families reside on farms near Didsbury, and Ian at home. Besides these there are two brothers, L. R. Weber of Bergen, Alta., and E. R. Weber of Kalamazoo, Mich., also seven grandchildren. A step-mother and brothers and sisters who reside near Vancouver, also survive.

Funeral services were held on Sunday afternoon at the M.B.C. Church, conducted by Rev. C. J. Hallman, and interment was made in Didsbury Cemetery.

The pallbearers, all pioneers of the district, were Messrs. N. B. Snyder, Amos Weber, Elah Shantz, James Adam, Ezra Thede and Ben Rosenberger.

IN MEMORIAM.

In loving memory of Charles Wrightson who passed away, March 15, 1935, and Elizabeth Laing who passed away March 24, 1935.

Town Council.

Consideration of arrears of taxes took up the principal part of the meeting of the town council held on Monday evening. A decision was made to send notices to all in arrears of business taxes, asking for payment before May 1st, after which date proceedings for collection will be taken. A scale of rents was also fixed for persons occupying properties that had come into possession of the town by way of tax enforcement.

A resolution was passed that direct relief be cut off on May 1st.

School Orchestra Will Broadcast

The Didsbury School Orchestra will broadcast a half hour program over the "Voice of the Prairie" Station, C.F.C.N. on Thursday March 25, from 7:30 to 8:00 p.m.

Vocal solos will also be given by Lois Edwards and Florence Chamberlain, and a trio by Eileen Geeson, Lois Edwards and Betty Boorman.

Evangelical Church Notes.

Next Sunday morning the pastor will speak on the subject of "Christ's Triumphant Entry." In the evening the topic will be "The Last Supper."

We are approaching the anniversary of the passion week of our Lord, let everyone attend prayer meeting and all the church services.

Knox United Church Notes.

Next Sunday we commemorate Palm Sunday, which is the beginning of passion week. We extend a most cordial invitation to all our friends to come to church. We are entering upon a period which should give rise to earnest thought about our faith in Jesus Christ and what He means to us. The sermon topic is "Crucified by Stupidity."

BIRTHS

at Didsbury General Hospital

March 11th to Mr. and Mrs. Lyle Honey a son.

March 14th to Mr. and Mrs. Stanley Keley a son.

March 15th to Mr. and Mrs. Harold Sees, of Bergen, a son.

March 17th to Mr. and Mrs. Albert Bouck, of Cremona, a daughter.

March 7th at the Holy Cross Hospital, Calgary, to Mr. and Mrs. C. P. Reimer a son, William Dale.

Didsbury Postmaster Receives Presentation

H. Morgan, our local postmaster, who has retired after serving three years as President of the Canadian Postmasters' Association, was presented with a gold watch at the annual meeting of the Association held in Ottawa last week.

E. J. White, Bathurst, N.B., was elected president; J. L. Jackson, Salmon Arm, B.C., vice-president, and C. D. Griffiths, Estevan, Sask., secretary.

A resolution was passed recommending that in post offices of less than \$400 a year revenue, where the postmaster can now be dismissed if charged by the Member of Parliament for partisanship, that the M.P. be compelled to make specific charges. It was also recommended that the custom in Quebec of opening the post office after church Sundays be stopped.

The executive endorsed the merit system, and stated that vacancies should be filled by promotion rather than by advertising. Other resolutions were that the post offices should be the sole vendors of radio licenses; that the rate of postage on commercial papers and audit books be lowered; and that a reduction be made in the fees for small C.O.D. parcels.

I.O.D.E. Fashion Show Next Wednesday.

The I.O.D.E. will sponsor a "Fashion Show" and Tea on Wednesday, March 24th, at 8:15 p.m., at the Opera House.

The local merchants will supply the latest styles in ladies' suits, dresses, coats and millinery which will be modelled by local mannequins.

Admission: Adults 25 cents and children 10c.

Will Send Delegate to Teachers' Convention.

An interesting meeting of the local branch of the Alberta Teachers' Alliance was held on Saturday afternoon in the Didsbury Public School. It was decided by those present to send the president, C. R. Ford, represent the local at the Easter convention at Edmonton.

After the business session, one of the recently produced play "Was it a Dream" was given. Tea concluded a pleasant afternoon.

Attention! Mr. Farmer

For your information we have obtained from the Provincial Government the following report on the experiments conducted by them in their Seed Grain Department last year. Please note that LEYTOSAN, the genuine English Product, which is sold exclusively by us shows a decided advantage over all other methods of treatment.

Repairs and Service

A Radio Renaissance?

The radio audience in Western Canada which has suffered expensively for some considerable time, and in recent months in inarticulate silence outside the home, has at last some reason to hope that some of the disabilities under which it has been suffering are about to be removed, or at least ameliorated.

The grounds for these hopes are based on the recent public utterances of Major W. E. Gladstone Murray, the imported general manager of the comparatively new set up, the Canadian Broadcasting Corporation, successor to the erstwhile Canadian Radio Commission, on the occasion of his first trip to the west since his appointment, which coincided with the re-organization of the radio governing body of the Dominion.

A year ago radio columns in the daily press were filled with lamentations and the gnashing of teeth of radio fans whose complaints of interference, inadequacy of programs and other causes of dissatisfaction with the status quo swelled into a diapason of discontent.

To the average Western Canadian owner of a receiving set it appeared that very little heed was being paid to his complaints and little or nothing being done to remedy them and that the only reply to his expressions of annoyance was to double his contribution to the commission for the privilege of listening in to what he did not want to hear.

Since that time the chorus of disapproval seems to have diminished somewhat but this must not be construed in official quarters that discontent has disappeared. It would be more correct to diagnose it as a demonstration of tolerance on the part of the Western radio public—a desire to give the new governing body an opportunity to study defects and disabilities in the hope that they will be able to remedy them and give the radio fans something more to their taste.

As intimated at the outset there is some reason to hope, in the light of Major Murray's statements that something is going to be done, and in the near future, to give Western Canadians a better break in the radio field than they have had hitherto.

It is true that Major Murray's public comments were entirely devoid of any information as to what steps will be taken precisely to remedy long-standing complaints but the general tenor of his published remarks indicated that he is fully aware of the causes of discontent on the prairies and an intimation that something is going to be done in an effort to more nearly meet the wishes of the licensees in this section of the Dominion was coupled with the interviews he gave the press.

The mere fact that recognition is given to the existence of complaints is half the battle and engenders a reasonable hope that solutions of some of the major problems are to be found within a reasonable time.

The following extract from one of his interviews shows that Major Murray has put his finger on some of the chief causes of annoyance to Western Canadian radio users:

"Major Murray expressed great interest in the difficulties of Western Canadian listeners to obtain their favorite United States programs through 'blanketing' of the southern stations by Canadian ones. He hoped a new allotment of wave lengths would follow, with special benefit to Canada, from the world conference on wave lengths to be held in Cairo in 1938. That conference likely would be preceded by regional conferences.

"Despite the existing wave length agreement between Canada and the United States, no agreement existed with Mexico and considerable difficulty was noted from that quarter. The C.B.C. manager also expressed his awareness of the difficulty of local listeners obtaining their favorite Canadian programs because of local programs by stations in their area."

"Major Murray said the average radio listener wanted variety with a fair measure of better class music.

"He announced the intention of the C.B.C. to take part in a scheme of exchanging producers within the Empire and with the United States. He mentioned particularly proposed exchanges between the C.B.C., B.B.C. and N.B.C. It was wise, he felt, for Canadian program producers to widen their experience through visits to other countries and to let Canadians know what was being done elsewhere."

While the points mentioned by Major Murray do not by any means cover the entire ground, the very fact that he is quickly assimilating the causes of difficulties and objections in the west, is to say the least encouraging and his attitude indicates that he is anxious and willing to meet the wishes of the western audience, insofar as it may be feasible.

Tribute To Dickens

125th Anniversary Of The Birth Of Famous Novelist Celebrated In London

The 125th anniversary of the birth of Charles Dickens was celebrated recently in a London "werry changed" from the city the novelist knew.

Tabard Players marked the occasion by performing scenes from "The Tale of Two Cities" in the yard of the Old George Inn, a Southwark hostelry Dickens knew.

In a down-town restaurant, members of London's Dickens' Fellowship dined and talked of the novelist over good English "wittals."

Sir Stephen Killick presided and two dramatists, John Drinkwater and Sir John Squire, paid tribute to Dickens' memory.

Judge: "Your wife says you struck her, Uncle Josh. Have you any excuse to offer?"

Uncle Josh: "Ah suttinly has, Jedge. While Ah was prayin' fo' rain fo' mah crops, she was prayin' fo' fair weather 'cause she was gwine to wash."

On the planet Jupiter, a year has 10,000 days.

Printed In Error

Because Jubilee Stamp Was Printed With Wrong Color, Collector Makes Nice Profit

A young stamp collector made a profit of about £1,500 (\$7,500) because three sheets of a 2½d. King George V. silver jubilee stamp were printed in error in Prussian blue, the wrong shade of blue.

The collector bought one of the stamps in a post office. Noticing the mistake, he bought the rest of that sheet and two other sheets. Then he approached a syndicate, which bought the stamps at £5 (\$25) apiece.

Tribute To British Design

Foreign Air Ministers Think 'Planes Best In World

Foreign air ministers and chiefs of staffs are coming to Great Britain to purchase British planes, which are now the best in the world, Viscount Swinton, secretary of state for air, told the Radio Manufacturers' Association. "That is about as good a tribute one can have to British design," Lord Swinton said. "I don't think we need be pessimistic about it."

"HERE'S THE CHEW THAT'S FRESH AS A DAISY AND SWEET AS A NUT!"

BIG BEN

THE PERFECT Chewing Tobacco

Robot Gives Warning

Officers Of Anti-Aircraft Brigade Testing Remarkable Machine

Officers of an anti-aircraft brigade at Manchester, England, are testing a remarkable machine which gives warnings of air invaders. The "predictor", operated electrically, records the speed of approaching airplanes, their height, and the speed and direction of the wind. The information passes by electrical cable to the anti-aircraft guns.

HIS BACKACHE WAS UNBEARABLE

Kruschen Brought Him Relief From Pain

This man of 31 was prematurely aged by backache, when he should have been enjoying the best years of his life. Here he tells how Kruschen helped to restore him to health, after months of pain:

"I was in hospital for ten weeks, owing to kidney trouble. When I was discharged I felt like an old man, although I am only 31. If I stooped to do anything it was agony to straighten up again. Several people advised me to try Kruschen Salts. I tried them and found they gave me relief from pain and I felt better in every way. I cycle 28 miles a day to and from work, and shall keep up the daily dose of Kruschen because I can now do the journey to and from work and not feel any the worse for it."—S.V.C.

When the internal organs cease to do their work properly, impurities begin to accumulate in the system, and cause troublesome symptoms. Kruschen Salts help to stimulate the liver and excretory organs to healthy, regular activity, and thus assist them to rid the system of harmful impurities.

SELECTED RECIPES

CALIFORNIA BREAD

Temperature: 450-350 degrees F.
Time: About 1 hour.
1 cup milk; ½ cup sugar; 1 tablespoon shortening; 1 teaspoon salt; 1 cake fresh yeast; 2 tablespoons lukewarm water; 1 cup Royal Household Flour; 2 cups Meota Whole Wheat Flour; ½ cup candied orange peel, chopped; ½ cup walnuts, slightly chopped.

Method: Scald milk; add sugar, shortening and salt; cool. Add yeast cake softened in lukewarm water. Add Royal Household flour and 1 cup Meota flour; mix thoroughly; continue adding Meota flour until mixture is stiff enough to knead. Turn on floured board and knead until smooth and elastic. Let rise until double in bulk; knead in orange peel and walnuts. Shape into a loaf and put in bread pan or small greased baking powder cans. Let rise. Bake in a hot oven for 10 minutes; reduce heat and continue baking. Makes 1 loaf. Entire time for making this bread is approximately 3½ hours.

Recipe by Mildred Mae MacKenzie Copyright.

EGGLESS MAYONNAISE

3 tablespoons evaporated milk
2 tablespoons lemon juice or vinegar
½ teaspoon mustard
¼ cup Mazola
¼ teaspoon pepper
¼ teaspoon paprika
½ teaspoon salt
½ teaspoon sugar

Combine the dry ingredients, add the milk and gradually beat in the Mazola, then add the vinegar and beat until smooth. This dressing will keep indefinitely in a cool place.

The best time to sell Canadian wheat crop is right after it has been harvested, thinks Hon. T. A. Crerar, who has wide experience in the grain trade.

Move Alienates Sweden

Hitler's Decision About Nobel Prizes Sweeps Away Good Feeling

Chancellor Adolf Hitler's decision forbidding Germans to accept Nobel prizes in the future created a more unfavorable impression in Sweden than anything that has happened in Germany since the "purge" of June, 1934. By a stroke of the pen Hitler has swept away most of the good-will toward Germany built up by Dr. Joseph Goebbels' propaganda department in the last few years.

The official German explanation is scorned and it is said that the mere fact that the Nazi government has taken this decision shows that it realizes that the prizes still constitute an important link between Germany and the outside world.

Even during the World War the work of the Swedish Nobel Committee, which awards the prizes for physics, chemistry, medicine and literature, was not interrupted, and Swedes remember with pride that they did more than any other people to prevent the world of science being submerged in the hatreds and suspicions of the Great War. Between 1914 and 1918 the physics prize twice was awarded to Germans and twice to Britons and in the same period the chemistry prize was awarded to a German, Briton and American.

Since 1901, when the first prize was awarded, nearly a quarter of all the prizes have gone to Germany.

Adversity is the only scale that gives us the correct weight of our friends.

In the profane lexicon of the inconsiderate driver, there's no such verbiage as "Pardon me."

Build Planes In Canada

Big Boost To Canadian Aircraft Industry Is Anticipated

A big boost in the Canadian aircraft manufacturing industry is anticipated shortly as it is understood that if the Royal Canadian Air Force estimates are approved orders for airplanes will be placed wholly in this country. At present the Government plans to purchase more than 100 airplanes of various types. British designed aircraft will be built under license in Canada.

With British airplane factories working overtime to meet the unprecedented demand for fighting aircraft to place Great Britain on a parity with continental powers, firms in the British Isles are not in a position to accept orders from this side.

A short time ago Australia was compelled to place orders for aircraft in the United States owing to this reason.

London is the world's best-dressed city, says a German expert.

LEAPS OUT OF BED EACH DAY

Learns how to get primitive health. Now bounds with energy. No more sluggish, tired mornings.

Banish penalties of modern living. Get rid of tired, sluggish, bad-taste, headachy mornings. Wake up peppy and full of energy. It's easy, you'll think it miraculous! Follow the example of thousands who have regained full health and energy with Fruit-a-tives. The prescription of a famous Canadian doctor, Fruit-a-tives contain extracts of fruits and herbs and act to bring normal, healthy liver action, stimulating the flow of bile, helping four other vital organs... cleanse the elimination tract of wastes and poisons... tend to purify the blood of poisons and acids. Fruit-a-tives' unique tonic effects bring new energy, new health. So try Fruit-a-tives today. For sale everywhere. Cost is low, 25c, 50c. For your own protection refuse substitutes. Insist on "Fruit-a-tives".

Cut Down Food Wastage

Modern Lapland Is A New Country That Has Been Created by Use of Electricity

If you ask the average person to describe Lapland he will tell you it is an Arctic waste inhabited by people who wear furs, drive reindeer and live in primitive huts. As a matter of fact, many of its houses are now lighted with electricity, express trains speed across it, and, 100 miles above the Arctic circle, it has a city of 14,000 white inhabitants. Modern Lapland is a new country—created by electricity.

Henry Albert Phillips, in an article condensed from Popular Science Monthly by the Reader's Digest, tells us: For 200 years, scientists have known that in Arctic Lapland, guarded by ice and snow, polar darkness and terrific snow, lay one of the world's richest strongholds of natural wealth. But modern prospectors found that this wealth surpassed the wildest dreams, and that more than one billion tons of the highest grade iron ore in the world—averaging 60 per cent. pure as against the world average of 44 per cent.—lie within a five-mile radius of Kiruna, the new wonder city of the Arctic. An eager world market awaited this ore in unlimited quantities for the manufacture of the highest-grade "Swedish steel" products. There remained nothing to do but to provide power to mine the supply.

No less than nine rivers plunge down mountainsides and over precipices to rush across this country which forms the northernmost part of Sweden. Of these, the Lule river, at Porjus Falls, was selected to become the electrical nerve centre of modernized Lapland. Here a unique underground power plant was built, 160 feet beneath the surface, where freezing is improbable even in the most severe Arctic weather.

From the engineers' quarters, above ground, an electric elevator takes one down to the power house, a vault-like room blasted out of solid rock. Its elongated shape gives it the appearance of the crypt of some vast cathedral dedicated to the worship of the gods of light and power.

In the control room the engineer in charge sums up the situation: "If I pressed this button, all the trains in Lapland would instantly stop. If I pressed this second button, all mining operations would come to a stand still. And if I pressed the third button, every home, store, church, school and public building, not only in the whole of Lapland, but in Narvik, Norway, 300 miles away, would be without heat and light." In other words, but for the subterranean power plant Lapland would go back into semi-darkness and become again a primitive wilderness of frozen silence.

Mining operations centre around Kiruna, a hundred miles north of the Arctic circle and 850 miles north of Stockholm. The city lies partially in the valley, partially on the mountain-side. The mines themselves are amongst the most curious in the world. The ore came to the surface in some mighty prehistoric convulsion that raised two solid mountains of iron nearly half a mile in height. Mining is done by literally slicing down through these deposits.

Three times every day, excepting Sundays, the town of Kiruna is shaken to its foundations. For a full ten minutes each time sirens shriek and wild alarms echo through the hills. People can be seen running down the mountainside in every direction. Half the population stops its cars and braces itself for the crash and roar.

The ore blasted loose by the explosion goes through giant electric crushers, and is then dropped through vertical shafts into a chamber at the base of the mountain, at the end of a tunnel a mile and a half long. Here, 35-ton freight cars are loaded, 20 of them in 15 minutes. Emerging from the tunnel, the trains are turned over to the state railways, to go to by electricity to Narvik, Norway, 100 miles north (yes, to the north, for Narvik, by reason of its location on the gulf stream is an open port the year around, while the nearest Swedish port is icebound six months of every twelve). These trains carry 7,000,000 tons of ore to steel manufacturers every year. Ger-

many, England, France and the United States are the other purchasers.

And so, where a few years ago there were only scattered reindeer trails, to-day we find the most northerly railroad in the world, second to none in up-to-date equipment. In less than 20 years the whole of Lapland will be intersected by a network of electrified railroads, reaching all the vast ore deposits yet untouched, transforming desolate regions into prosperous mining fields.

Not Particularly Easy

Duties Of Average Minister Mean Plenty Of Work

Those who are better acquainted with the duties of the average minister know that far from a life of ease, he is called upon to perform such a variety of tasks that his profession, rather than being one of ease is in reality a very trying one.

The Sunday sermons form a small part of the work of the average minister who is really tending to his job. There is the practical side of Christianity to be lived out during each moment of every day. There are the calls to sick beds, the comforting of the oppressed, the advising of the young, the helping of the poor.

The minister is among the first to greet the new born babes. He is the one called upon to perform the last rites at the grave side. He is seldom highly paid for his services and is expected to do more gratis than any other person, including politicians. He is supposed to keep his chin up and look cheerful when addressing row upon row of empty seats that should be filled with those to whom he has rendered some priceless service through the week or in days past.

Despite the abuses that the average minister is subjected to by an unthinking congregation, he carries on with a fortitude that is amazing and wins the admiration of his church members and his fellow men. The world would be a dreary and unthinkable place without these stalwarts known as ministers.—Lindsay Post.

Weight Of Birds

Even Large Ones Are Surprisingly Light States Naturalist

How much do birds weigh? What, for instance, is the weight of a heron? A good specimen of heron may be over three feet in length with a wing-span of five feet. Questioned as to its weight, two persons replied respectively 25 pounds and 15 pounds. For myself, the question of the weight of birds being a thing to which I had never given any consideration at all, I should have guessed, roughly, 10 pounds. All these figures are crazy.

The weight of a fine specimen of male heron, according to that parochial but patient Victorian observer of English wild life, the Rev. F. O. Morris, is only three pounds. For so large and voracious a bird, a heron living on eels, rats, trout, young moorhens and even snipe, the figures seem incredible. Yet three pounds is a great weight for a bird. The snipe itself, male, weighs only four ounces, the female slightly more. The sparrowhawk weighs only five or six ounces, with the female half as large again. A wood-pigeon weighs about 20 ounces, a moorhen 16, a herring-gull 30.

But it is the weight of the really small birds that is staggering. A nightingale weighs six drachms, a blue-tit under half an ounce, a chiff-chaff three drachms, a wren two and three-quarter drachms. Even a cuckoo, strong-flying, looking almost as large as a pigeon, scales only a quarter of a pound, a fraction more than a blackbird.—London Spectator.

A popular superstition among Alabama mountain folk is: "Cook peas on New Year's Day and you will be blessed with plenty all the year."

Antipater of Palestine is thought to have made the selection of the Seven Wonders of the World about 200 B.C. 2191

Wild Life Worth Millions

Includes Furs, Game, Fish And Sportsmen's Outlay

The cash value of the wild life of Canada is estimated by the Department of Mines and Resources at \$53,000,000 a year, or more than \$1,000,000 a week. This does not include commercial fisheries or forests, but is made up of \$22,714,000 for furs, game fish, game mammals and game birds, estimating only the meat value of the fish and game.

It includes \$1,975,000 for fire arms and ammunition, \$346,000 for fishing tackle, \$1,350,000 for sports clothing, tents, etc., for sporting use, \$169,000 for cameras, films and accessories for nature photographs, \$210,000 for sporting and natural history magazines, \$6,404,333 for the annual income received from sportsmen and nature lovers by Canadian railway and steamship lines, another \$6,875,000 annual income received from sportsmen and nature lovers by Canadian hotels and boarding houses, \$330,000 received by the government liquor stores, \$350,000 paid to guides and other employees and \$5,090,350 estimated to be the annual cash value of wild life of Canada in supporting Indians and Eskimos, counting food for 46,000 Indians at \$100 each and 3,269 Eskimos at \$150 each per annum. In addition to the above items, it is estimated that nearly \$8,000,000 is expended annually for automobiles and pleasure craft used for hunting, fishing and similar purposes.

Franklin's Loan

If Handled According To Instructions Would Have Helped Many

When Benjamin Franklin was in Paris, a fellow-countryman asked him for money. Mr. Franklin wrote the applicant as follows: "I send you herewith a bill for ten louis d'ors. I do not pretend to give such a sum, I only lend it to you. When you shall return to your country you cannot fail of getting into some business that will in time enable you to pay your debts. In that case, when you meet with another honest man in similar distress you must pay me by lending this sum to him, enjoining him to discharge the debt by a like operation when he shall be able and shall meet with a like opportunity. I hope it may thus go through many hands before it meets with a knave to stop its progress.—Christian Science Monitor.

Farmers Pay Taxes

Last year 96 Saskatchewan farmers paid Dominion income taxes amounting to \$3,166, according to a return tabled in the House of Commons by State Secretary Rinfret. M. J. Caldwell (C.C.F.-Rosetown-Biggar) had asked a series of questions covering Dominion income taxes from Saskatchewan in recent years.

Watches first were made at Nuremberg, Germany, at the beginning of the sixteenth century.

Progress Has Been Made Towards The Production Of Perennial Wheat

Potatoes For Seed Purposes

Much Room Seen For Improvement In Their Production

All growers of seed, whether it be seed grain, vegetable seed, or any other kind of seed, should endeavor to produce seed of superior quality by starting with the most suitable varieties and strains, and selecting the very best seed for their own plantings. In the production of seed potatoes, there is much room for improvement, and all too frequently bruised, damaged, small off-type, or otherwise inferior left-over potatoes are planted, particularly if prices have been alluring. Actual selection of superior strains of potatoes is apparently not receiving the attention that is so fundamental to success, and yet the seed potato growers may be producers of really high quality cattle and other live stock, and would not for a moment think of using the same tactics in their breeding program. Why then, not apply similar care and principles to the production of high quality seed potatoes.

The Seed Potato Certification Service has been advocating such a system for many years with varying success. It is true, that diseases have been controlled, or methods for their control practised, but that is not the whole story. An effort should be made by every seed potato grower, through selection, to produce stock which in addition to being more or less free from serious diseases, is also apparently disease resistant. Good seed should be true to type, high yielding, and of good appearance. That is to say, tuber shape, color of skin and eye characters should all be considered and an effort made to cull any not conforming to a certain standard of excellence. In other words, seed selection.

The tuber unit method of planting, of which much has been written, is one big step toward such an end and growers would be well advised to practice every means by which the quality of seed may be improved. Such practices are becoming more and more general in face of modern competition. For further information the nearest Plant Pathologist should be consulted, or the Seed Potato Certification Service, Division of Botany, Central Experimental Farm, Ottawa.

Knew His Horses

Teacher: "What is the opposite of sorrow?"
Jimmy: "Joy."
Teacher: "And the opposite of misery?"
Jimmy: "Happiness."
Teacher: "And what is the opposite of woe?"
Jimmy, without a moment's pause: "Gee-up!"

As the result of experiments carried out under the direction of Dr. L. E. Kirk, Dominion Agrostologist and Chief of the Forage Plants Division, Experimental Farms Branch, Dominion Department of Agriculture, assisted by the National Research Council, considerable progress has been made towards the production of perennial wheat.

Dr. Kirk states the project of developing a perennial wheat was begun two years ago and since then it has been vigorously prosecuted on a rather extensive scale. About 20,000 cross pollinations were made in 1935 and about 50,000 in 1936, both in the greenhouses under artificial light during the winter months and in the field during the summer. About a dozen species and varieties of wheat, and an equal number of species of grasses were used.

There still remains a great deal of work yet to be done before the desired objectives are reached, Dr. Kirk emphasizes. A wide range of hybrid material is on hand from which selections can be made and it is at present impossible to predict just what types of plants out of this material will be found most suitable and useful. It is believed, however, that these crosses between wheat and grasses may easily result in new types of forage plants of great value to agriculture. It is altogether likely that perennial wheat can be obtained also, but it seems rather doubtful whether wheats which will measure up to the high standards of quality, which are required in Canada, will be attained.

There are many and exacting difficulties associated with plant breeding work of this kind. Sterility which occurs in the original hybrids, is only one example. In order to obtain seed from "sterile" hybrids, it is necessary to back-cross them again, using pollen from the wheat parent. This may have to be done for several generations, in order to obtain fertility and seed production, but during this process the plant characteristics most desired may be lost. Fertile hybrids are few and far between.

During the work of the project under discussion by the plant breeders in Ottawa and at the Dominion Forage Laboratory at Saskatoon about 40 hybrid plants that exhibit almost complete fertility have been secured. Some of these have produced as many as 2,000 seeds each. All of these hybrids are perennial in habit of growth, and since they do not require to be back-crossed, already one of the chief difficulties has been overcome. Meanwhile the experimental work is being continued in Ottawa and at Saskatoon.

Old Theory Is Attacked

Cannot Forecast Crop By Subsoil Moisture Opinion Of Expert

Crop experts in Chicago, who claimed to have developed a system of forecasting grain production by studying subsoil moisture conditions, were "just talking through their hats," Dr. E. S. Archibald, Dominion director of experimental farms and agricultural research, said.

"Subsoil moisture merely is a guarantee the crop has a start," he explained. "It could not possibly carry the grain growth through the summer. What determines the success of the crop is the amount of summer rains you have."

"Of course, you can have blasting heat, like last summer, which burns the crop up regardless of moisture. And you can have windy, dry weather with no rainfall."

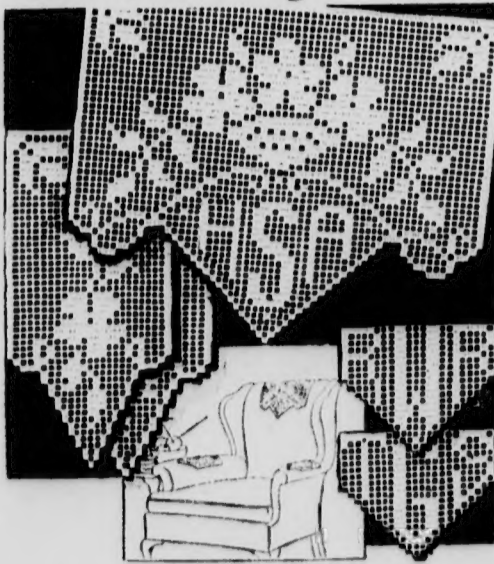

Johnnie (looking out of the window): "Oh, mother, a motor car has just gone by as big as a barn."

Mother: "Johnnie, why do you exaggerate so terribly? I've told you forty million times about that habit of yours, and it doesn't do a bit of good!"

Note from Teacher: "Johnny has been very mischievous in school. I think I will drop in and see his father!"

Note from Mother: "Dear Teacher, if you can't handle Johnny, you'd better not tackle his father!"

Make Own Monogrammed Chair-Set

Household Arts by Alice Brooks

Initials Heighten Chic of Fillet Crochet Set

PATTERN 5797

A chair set with your very own monogram will thrill you—and here's an easy way to realize that thrill. Crochet—simple and quick—forms this lovely floral motif, into which the desired initials (chosen from the pattern's three complete alphabets) are worked as part of the design. Add that personal touch to your household linens, too; crochet the initialled motif separately and set it into towel, pillow case or scarf. In pattern 5797 you will find charts and directions for making a chair back 13 x 16 inches, 6 x 13 inch arm rests, a 4 inch (in string) alphabet for the centre letter and a 3 inch right and left hand alphabet; illustrations of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 475 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

J. E. Gooder - Editor & Manager

The World of Wheat.

By H. G. L. STRANGE

Director "Crop Testing Plan."

Wanted.—A Perfect Wheat! At all events a wheat earlier than Red Fife.

Dr. Seager Wheeler, in his excellent book, "Profitable Grain Growing," tells us that in 1910 he applied himself to the search for just such a new variety.

In a field of Australian "White Bobs," Seager Wheeler found a head that had red kernels. He multiplied this, and one of his selections from it is the famous "Red Bobs 222" (sometimes called Early Triumph), an important early wheat about six days earlier than Marquis with good milling and baking qualities, very strong in the straw, and yielding quite as high as Marquis.

Its defects are that in a dry fall it shatters rather easily, and in a wet fall and on certain types of soil it sometimes throws a starchy and piebald kernel.

Being susceptible to black stem rust, however, it is not recommended for the rust areas of Manitoba or Eastern Saskatchewan, but it is now being increasingly used in parts of Alberta and Western Saskatchewan.

Dr. Seager Wheeler, by his skill and thoroughness in producing Red Bobs and a fine strain of Marquis 10-B, has added many millions of dollars of extra wealth to the pockets of Western Canadian farmers.

Following factors have tended to raise price: Wheat purchases exceeding all expectations being made by Italy, Germany and Great Britain from many countries -- World stocks of wheat steadily decreasing -- The United Kingdom buys more nuts and grapes from the U.S. -- World inflation of money apparently beginning to increase prices of most commodities.

Following factors have tended to lower price: Current prospects are for largest U.S. winter wheat yield in six years -- Increasing wheat prices forcing European, Oriental and Indian people seek substitutes for wheat, flour and bread -- Indian harvesting starts. Orders now being taken for early wheat shipment -- Turkey and Czechoslovakia export wheat.

Alberta Moves to Make Drivers Dim Car Lights

Important changes in the Vehicles and Highway Traffic Act, which are of interest to all motorists and others using the highways of this province, are provided for in an amending bill introduced in the legislature.

Probably the section of greatest interest is that which makes it compulsory for headlights on motor vehicles to be dimmed or dropped. This must be done at a distance of not less than 350 feet.

It is recalled that in recent months strong protests have been expressed at meetings over the menace of glare headlights and the danger of serious accidents.

Another section of the bill requires cecles to be equipped with a lighted headlamp and a lighted tail light or rear reflector when being ridden on

a highway at night.

The bill also contains another important section which provides that all motor vehicles shall be equipped with adequate brakes. Standards of adequacy are prescribed while police officers may inspect brakes of any vehicle operating on the highway and may order it to be brought to a brake adequacy forthwith.

Summer School In Fine Art, Design To Be Held at Banff

The Provincial Institute of Technology and Art will conduct a summer school in fine art and design at Banff from August 2nd to August 27th in co-operation with the Extension Department of the University of Alberta and with the financial assistance of the Carnegie Foundation of New York. It is desirous to make this facility known and available to as many persons in the province as have aptitude in these subjects, and with this in view fees are merely nominal.

To encourage those who would profit the committee in charge will offer to the person in each of several districts who makes the best drawing or painting within the district, a scholarship to the value of \$10.00 as payment of fees for tuition at the Summer School. Didsbury, Olds and Carstairs are among the districts in which the scholarship will be available.

For further information communicate with Provincial Institute of Technology and Art, Calgary.

Burnside Notes

Mr. Dick Metz spent the week
end with friends at Bergen.

The executors of the estate of the
late Edward Hetzberg are holding a
sale on Monday next.

Miss Bertha Reschke and Mr.
James Dundas were Sunday dinner
guests at the George Metz home.

Mrs. Bertha Brechwald is holding
an auction sale on Tuesday, March
20th.

Miss Joan Woods has been stay-
ing with Miss Selina Dedels this
week and attending the Burnside
school.

Mr. and Mr. N. Eckel were Sun-
day morning guests with Mr. and
Mrs. B. Woods.

Mr. and Mrs. Walter McCulloch
spent Monday with Mr. and Mrs.
Otto Bittner.

Mr. and Mrs. John E. Gooder
visited the Campbell and Patterson
homes on Saturday. They were ac-
companied home by Mrs. Avelson,
who had been visiting her daughter
Mrs. Patterson.

The annual meeting of the hall
board was held on Monday evening.
The various reports showed every-
thing in good standing, considering
the adverse conditions in the dis-
trict. The election of officers re-
sulted in Mrs. Eckel being elected
for a three year term and Walter
McCulloch for a two year term.

Mountain View Notes.

Isaiah Haynes is visiting his
brother Jack, who is in hospital
at Edmonton.

The time of service for the
M.B.C. Sunday School has been
changed to 10:30 Sunday morn-
ings.

Mrs. Funk and her daughters,
of the Burns Ranch, are leaving
the district soon after the sale
which is being held this Friday.

Alf Cook met with an accident
to his eye on Friday, but we are
pleased to hear that he is recover-
ing.

Mt View S.C. Group held its
annual meeting at the home of
Ed. Liesemer, with a fairly good
attendance. Officers elected were
Hugh Roberts, president; Ed.
Liesemer, vice-president, and
Eric Atkinson, secretary. The
social committee is comprised of
Mrs. J. Steele, Mrs. T. McCaig
and Mrs. Ed. Liesemer. Visitors
from Didsbury and Lone Pine
were present, and good talks on
Social Credit were given by Mr.
M. Weber and Mr. L. Hehn. A
resolution was passed expressing
confidence in Premier Aberhart
and his government. It was
decided to hold a pie social in the
Community Hall on March 25th.
After a few musical selections
from Sid Morasch the meeting
dispersed, thanking their hostess
for a delicious lunch.

Social Credit Notes.

The Didsbury Pioneer Social Cre-
dit Group held a meeting at the
home of Ben Rosenberger, on Mon-
day evening, when the group re-
ceived a visit from the constituency
president, Mr. Howard Hamill, of
Carstairs, who gave an inspiring
address.

A resolution has been sent from
this group to Premier Aberhart and
the local M.L.A. conveying an ex-
pression of confidence and a request
to go on with their work and work
out their problems to the best of
their ability. This group is deter-
mined as ever to support the S.C.
government to the last ditch.

Next meeting will be held on
Monday, March 22 at the home of
Matthew Green, at 8 p.m.

Doings of Our Neighbors

Carstairs will hold a Stampede
again this year, if a suitable date
can be arranged. It will be neces-
sary to sandwich between Sundre
and Calgary in order to obtain good
bucking stock.

Melvin Notes.

Our young people are enjoying
skating now the snow has gone.

Misses Dorothy Youngs, Hazel
Ray and Mr. Ross Youngs were
the Sunday dinner guests of Mr.
and Mrs. Percy Hosegood.

Melvin Go-getters will hold
their whist drive on March 22nd
and a dance on April 2nd. Now
the roads are in good shape we
hope to see larger crowds at these
social events.

A number from the district
report spending a very pleasant
evening Saturday with Mr. and
Mrs. Ted Cuffling, who entertain-
ed in honor of Mr. and Mrs.
George Julien.

A charivari was held at the
home of Mr. and Mrs. J. Jacob-
sen in honor of their son Lynden,
who has taken unto himself a
helpmate. A few from the dis-
trict attended the celebration.

Mr. Peter Johnston visited his
brother Thomas at Drumheller
on Monday. Mrs. Johnston was
a visitor for a few days in town
last week with her parents, Mr.
and Mrs. Troyer.

Word has been received from
Mr. and Mrs. Roy Shaw to the
effect that they are taking up
residence in San Francisco. We
all wish them success across the
line.

CARD OF THANKS

We wish to tender our sincere
thanks to the many friends for
their kind assistance and sympathy
extended during our recent bereave-
ment.

WORLD HAPPENINGS BRIEFLY TOLD

The House of Commons committee on the Elections and Franchise Acts rejected a proposal to make election day a public holiday.

Major-General Sir Frederick O. W. Loomis, D.S.O., C.M.G., K.C.B., who commanded the 3rd Canadian Division at the close of the Great War, died recently in Montreal.

Naval Minister Mitsumasa Yonai told the diet Japan has "no intention of building up her fleet to equal those of the world's strongest naval powers."

The reconstructed Bank of England—repository of the nation's gold—is being built to last 1,000 years. When completed, experts say it will be virtually impregnable and the strongest building in the empire.

An increase of \$6,869 in the world total of scouts during 1936 in the 49 countries recognized by the international committee was reported at a meeting of the council of the Boy Scout Association. Total membership was 2,592,832.

The Royal Canadian Mounted Police was "thinking of installing" radio equipment in patrol cars. Major-General Sir James H. MacBrien said on his arrival in Halifax on an inspection tour of Nova Scotia detachments.

Importance of increasing agricultural production in the United Kingdom in order to reduce the load on shipping and the navy in the event of war was stressed by Sir Thomas Inskip in addressing a farmers' club at Fareham, Eng.

Canada's transportation problems are too varied for any immediate short-cut solution. Hon. C. D. Howe, minister of transport, told a Board of Trade banquet. He believed the Dominion had too much in transport facilities for its present needs.

Men Better Inventors

Have More Ideas Than Women About Large Things

Woman has not, apparently, as inventive a mind as man.

Out of 7,791 patents issued in Ottawa by the commissioner of patents last year, only 58 were made by women, slightly better than the year before when of a total of 8,713 only 52 were issued to women.

Investigation showed women's minds do not invent large or important things but rather little knick-knacks, kitchen utensils, brushing and scrubbing utensils, dress improvements and knitting and tatting instruments.

The sun varies in brightness over an 11-year period as the sun-spots wax and wane.

Italy plans to build 1,700 miles of road in Ethiopia within two years.

WOMEN WHO SUFFER

WOMEN who suffer in silence often pay a double penalty for wearing this gag of unselfishness or silly pride. Painful periods are nature's warning that something is wrong and needs immediate attention. Growing girls as well as women in middle life are often sufferers from female irregularities. They find Dr. Pierce's Favorite Prescription is a dependable tonic. Read what Mrs. John Roth, Route 4, Embury, Ont., said: "I lost weight, suffered from headaches and my strength was completely gone. It was almost impossible for me to eat. Mother advised me to take Dr. Pierce's Favorite Prescription and in a short time I was feeling fine again." New size, tabs. 50c. Buy now!

PANTIE-FROCK FOR ACTIVE KIDDIES INVITES HARD WEAR

By Anne Adams

With Spring well on its way, you'll want to make sure that your young "mischief" has plenty of fetching school and play frocks for the sunny days ahead! And clever mothers everywhere will immediately recognize Pattern 4326 as being just the saucy model that will please a fashion-wise Two or Ten year old. Any youngster will just adore the long-wearing and comfy matching panties that accompany this easy-to-make pattern and enhance its practicability. Anne Adams well knows the youthful flattery of a pointed collar topping a bodice that wears buttons back and front. And what kiddie would not welcome the fun of choosing between dainty puffed or flared sleeves? For fabric, select a fast-color, washable cotton.

Pattern 4326 is available in sizes 2, 4, 6, 8 and 10. Size 6 takes 2 1/4 yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Royal Naval Review

Home Fleet Will Be Brought Into The Thames For Coronation

The home fleet will be brought into the Thames for the Coronation.

It was announced that battleships will anchor off Southend and destroyers and submarines in "London Pool" and near London Bridge. They will be berthed there May 7-13, after which they will sail for the royal naval review May 20 at Spithead.

Battleships of the second battle end include the Nelson, Rodney, Royal Oak, Resolution and Ramillies. They will be accompanied by the aircraft carriers Courageous and Furious.

The smaller vessels will include the new cruisers Southampton and Newcastle. The ships will be open to public inspection.

Angora cats are the largest of pet cats known. 2191

Remembers Accident

Man Once Knocked Princess Juliana Down With Bicycle

Arie Schilder, now a resident of Pella, Iowa, took a personal interest in the marriage of Princess Juliana of Holland because he once knocked her down with his bicycle.

The accident occurred in July 1912, when Juliana was only three.

Schilder lived at Apeldoorn, where he was delivery boy for a meat shop. The royal family had gone to their summer place at T'loo, just adjoining Apeldoorn.

"I was riding by the palace, on my way to make a delivery," Schilder recalled.

"I guess I must have been thinking about the dangerous wild boars that Juliana's father kept on the estate for hunting, because I failed to notice a little girl playing with two tame goats in the road.

"When I saw her, I tried to stop, but my bicycle struck her and knocked her down.

"Two nurses came running from the palace, followed by soldiers and bodyguards. Little Juliana was crying, but it was found she was uninjured except for a small cut on her knee.

"The guards surrounded me and I thought sure I would be taken to prison. But they finally let me go."

Schilder said that Juliana was so adored by the Dutch population that as soon as word of the accident reached town his friends wouldn't speak to him for days.

Australia and Antarctica are the only two continents that have no land connection with other continents, and are the only continents that lie entirely south of the equator.

Tailor Shares Honor

Furnished Edward VII. With First Pair Of Creased Trousers

A Karlsbad reach-me-down tailor claims to share with Edward VII. the honor of inventing the crease in trousers.

When King Edward, as Prince of Wales, was paying one of his many visits to Karlsbad, his trousers were badly torn in some way while he was walking in the town a long way from his hotel.

He was obliged to go into the nearest ready-made clothes shop and get a pair in which to continue his walk. Those selected had been a long time at the bottom of a large stack, and in consequence had become creased down the middle.

In this way they had lost the tubular appearance characteristic of the garments of that period.

When the Prince reached the promenade near the Spa Hotel, the fashionable crowds noticed with amazement the new style of trousers.

They became the vogue overnight, and trousers have been creased ever since. London Daily Telegraph.

Deferred Payment

Dated July 1, 1662, a receipt for part payment of a sum due Charles II.'s goldsmith for making his crown jewels—some of which will be used at the coronation of King George—has been presented to the British museum by Lord Cromer.

Donald—"My mother's awful funny."

Uncle—"Why?"

Donald—"Well, when we have mince pie or frosted cake, she asks if I want some; but when we have spinach she just gives it to me."

JACK MINER AS AN HORTICULTURIST

By Orville H. Dodge

Jack Miner examining a plant known as the Mallow which through cultivation has it so it is blooming twice the ordinary size.

It is true that Jack Miner's fame as a bird-lover has spread abroad, attracting as it has, thousands of birds and people to his bird sanctuary. But there is one branch of his work which has only been touched on by a few, namely, his investigation of tree and plant growths.

One newspaper recently termed him the "Luther Burbank of Canada", to which comparison he, with his modest smile, remarked: "That was going it a little too strong."

As one approaches his residence, it is easily observed that the front of his property, which is one hundred and twenty rods in length, is planted with flowers of many varieties, some of which have been bought and planted by him, others sent to him from unseen friends all over the continent.

When I asked him why he planted these beside the public highway, I was told: "There are so many automobiles passing that, rather than oil the roads to keep down the dust, I beautify the side of the road with such fragrant and beautiful flowers that every intelligent person who admires beauty at all will slow down in order to see them. As a result, they raise no dust."

While Jack Miner's property consists of but thirty acres, only three of these are occupied by the ponds of water. The balance is reforested and planted with flowers and shrubs, on the growth of which the naturalist has done considerable experimental work.

Among the trees planted on the sanctuary, there are thirty-five thousand Scotch pines, which, being evergreens, provide shelter and protection for the quail and insectivorous birds in the winter. Thousands of red cedar trees have been planted, which produce a little blue berry containing seeds that furnish excellent food for such birds as grosbeaks and cedar waxwings.

So much appreciated has the Jack Miner's study of trees been, that the Government officials of the United States have offered him a handsome salary to tour the States, lecturing on the methods and value of reforestation to the country. Officials from both Canada and the United States visit the Miner property annually to see the plan followed there.

Joining each small wood-lot are paths arched with climbing rambler roses, the borders of which are planted with many varieties of perennial flowers. After considerable study and experiment, Jack Miner has rambler roses which will grow 20 feet in length in one year, blooming as profusely as the common mallow. This latter flower blooms twice a year, is twice the normal size and gives a delightful fragrance.

Botanists and professors from a great number of the colleges and universities on the continent have visited Jack Miner's home and it has been often said that he has one of the largest out-of-door flower gardens in Canada.

When I asked Mr. Miner how he came to be so interested in flowers, he said it was an inheritance from his dear mother, who has since passed to the beautiful beyond, and who was the greatest lover of flowers he ever knew.

Jack Miner standing in his back yard among his flowers which he has planted and grown.

If You're Told to "Alkalize"

Try This Remarkable
"Phillips" Way
Thousands are Adopting

On every side today people are being urged to alkalize their stomach. And thus ease symptoms of "acid indigestion," nausea and stomach upsets.

To gain quick alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR—take two Phillips' Milk of Magnesia Tablets, which have the same antacid effect.

Relief comes almost at once—usually in a few minutes. Nausea, "gas"—fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA
PHILLIPS' MILK OF MAGNESIA

Gardening

Winter may linger or even return again later on, but the person who is determined to have a real garden this year is already making plans. After all, a garden is very similar to a house or a library, it must be dreamed over and planned well in advance of actual operations if the full enjoyment and usefulness are going to be derived. Varieties will have to be selected, rough measurements made, some arrangement perhaps for getting seed started indoors. All of these things take a little time and it will be time well and enjoyably spent.

All that will be needed for these preliminary plans will be a pencil and paper, and a good seed catalogue. If a government bulletin on "Gardening" can be added, so much the better. The catalogue, however, is indispensable. It should be of Canadian origin, because the seeds and directions listed therein have been chosen with our own Canadian climate in view.

Catalogues to-day are more than mere lists of flowers and vegetables. Much other valuable information is given. For instance, along with each flower there is a description of color, height, time of blooming and some intimation whether the variety is frost resistant and if it is suited to sun or shade. All these points will prove of good service, especially to the beginner. If a mixed border is to be laid out, it is important that the smaller plants be placed in the front, and one will want to know in advance whether the colors are going to match. Time of flowering, too, is good information to have because knowing that, it is possible to plan a continuous show of bloom right through the season.

According to horticulturists, most damage occurs at this time to roses, perennials, fruit trees and other plants which winter outdoors. Warm days that tempt too early growth, with near zero nights immediately after, and cold, drying winds from the North or West are responsible. Very tender things will benefit from a light covering of straw, leaves or even old newspapers for a few weeks until Spring really arrives. Nature's own protection, snow, is often absent.

Politician: "My boy says he would like a job in your department."

Official: "What can he do?"

Politician: "Nothing."

Official: "That simplifies it. Then we shan't have to break him in."

HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect the source or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemoid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemoid is a physician's prescription and is highly recommended. It is easy to use and it secures the height of relief for anyone to risk an operation when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER XVII—Continued

And where did this mysterious note fit into the mad scheme of things? Someone else knew the secret of her impending doom. From that one small touch of the hieratic writing, it must be someone who had been watching her since those terrible days in Egypt. Someone who knew! That was a disquieting thought. Who?

At the time of the opening of the tomb, newspapers all over the world had printed the story of Tut-Amen-Ra and the famous curse. They had referred to it as one much more bitter than other curses which have time and again been found in other tombs. They had made this story one with a touch of romance, of how Tut-Amen-Ra was reaching out from the grave to protect the priestess he loved.

But all that was such a long time ago! Surely everyone by this time had forgotten. . . . Except Starr Ellison, who had such good reason for remembering.

It had been sensational news at the time, but sensational news dies quickly. Starr did not believe there was a soul alive who could have recognized in the girl who flashed so brilliantly across the horizon of New York's night life, the supposed author of a ribaldry sensational book, as that other haunted creature who had fled from Egypt in terror.

Someone must have, though, or been waiting all the time. For now she was discovered. Somebody knew who might tell Michael!

As she moved like one in a bad dream from her living room on into the bedroom, Starr, looking into the mirror, saw with her own eyes how she had changed. Facing her was not the woman who had tramped country lanes in a pair of overalls with her bridegroom. Here, once more, was the girl who had indulged in a restless round of parties in an attempt to forget her dread of the unknown. The same woman who had taken sleeping powders at night to dull the agony of that ever-present "Thou Shalt Not—"

She cried out defiantly to that slender, frightened girl-woman in the mirror:

"It shan't hurt me! It shan't! I'll fight!"

But, oh, how she needed Michael's arms to give her courage!

The next morning's mail brought another of the anonymous notes. This time Michael turned it over to his wife without a word. Starr accepted it, her long black eyes a mute plea for his understanding, his sympathy. She did not get either. Michael's handsome tanned young face was as hard as a rock.

She could not open the letter under the forbidding glance of his stern, accusing eyes. She slipped it, unopened, into the pocket of her black satin lounging pajamas, not realizing how guilty that very action might appear to a jealous husband.

That was how it went, with the chill between them growing, the misunderstanding rearing up like an impassable wall. Every few days brought another letter—always at breakfast time when Michael was there to see and to pass it across the table with no comment except his bitterly unspoken ones.

All the letters were couched in the same terms. Each one impressed

more deeply upon the nerve-wracked young bride's sensitive consciousness the fact that she was doomed. With each mention of her own doom, and the further mention of Michael, it was borne in on her that the only way Michael could be saved was by some further sacrifice of her own. She must step out of the picture, but it was hard. . . . Life became one long stretch of putting off that inevitable moment. How could she live, even one day, without her husband?

The breach between Starr and Michael widened inevitably. It grew into an intolerable domestic situation. Husband and wife were almost strangers in their own home, and Starr quit home hunting or making any reference to any future time in their lives.

It seemed to Starr that every time she looked into her mirror she was thinner, and paler. Only her eyes burned unnaturally bright. The weariness was beginning to drag at her limbs again. Her body was tired. Her mind was tired. Her soul was tired.

She had sworn that she would fight against the thing which sapped away her vitality, but it was a losing battle. She was only too painfully conscious of that. One might fight against something that had shape and substance before the eyes. There were no weapons with which she could battle the unknown.

But affairs could not indefinitely go on as they were going.

A bold plan lay half formed in Starr's mind, brought to her nebulously during one of those long periods of silence and staring out at the sparkling river. It crystallized into a definite purpose one morning when she got out of her silk and lace covered bed and discovered that she could not stand on her feet steadily. She swayed dizzily, clutched at the bedpost until she regained her strength.

In that moment she saw her purpose plain before her, no longer nebulous. At last the time had come for that so-long-delayed idea that she must step out of the picture. She knew that she must see the thing through alone. Michael must never know of this thing—any of it. She had to go away. She would still fight—of course she would fight!—but if she lost, Michael must not know. If her battle proved successful, then maybe some day she and Michael might be able to start all over again, with all misunderstandings wiped out, with perfect peace between them, and no shadows to mar their happiness.

But where in the world could she go that he would not find her? Michael's forgiving nature—always blaming himself for everything—As soon as he found her gone, he would at once begin feverishly to search her out. No, she must fix things somehow so that he would not want to find her!

An item in the morning paper which she read as she nibbled at her solitary breakfast—Michael had already gone out—supplied her with an idea. The headline read:

SOCIETY MAN SAILS FOR SOUTH SEAS

Starr's lips twisted grimly. She did not feel the pain of her bitten lip, nor see the fleck of blood on it. Once before she had been called upon to make a sacrifice like this, for Michael's sake.

Somehow she managed to get into her clothes, and packed a bag. It was Sapphira's day off and she was alone. That was well. She felt as if she were incapable of ever again making any lying excuses, in words.

She sat down at her desk and scribbled a hasty note. Michael would never know that she had written it with her heart's blood. It was a brief note, ending up crudely with:

"—so it was all wrong, you see. Our marriage was to have been a play-marriage. Our mistake was in thinking it could turn out to be real. I

am sailing for Hawaii with Lance Marlowe this morning. Forgive me, Starr."

Tears sealed the envelope. Now Michael would not look for her! Starr walked out of her Egyptian apartment, without a single good-bye glance at the place in which she had known so much of joy—and of tragedy—to finish her battle alone.

CHAPTER XVIII.

A young woman sat in a comfortable chair in the doctor's office, facing the sun that streamed through the blue-velvet-curtained windows and made warm patches on the rug. The branches of the tree outside tapped against the pane. Bare branches. It was December.

The girl-woman who sat there quietly while the pleasant-faced physician studied her, tapping his fingers together contemplatively, was a slim, quiet creature, with delicate features above the deep collar of her thrown-back fur coat. Features like a cameo carved out of ivory. She wore a simple dark suit beneath her luxurious fur coat, and tendrils of midnight-hued hair escaped from beneath a small black felt hat tip-tilted over one eye.

Her eyes were the most striking part of her; what was noticed from the second she came within one's vision. Beautiful, long, black eyes that had a hint of the exotic as of some other race in them, but they burned with a bright, unnatural light, as though they had looked upon strange, unearthly things remote from the consciousness of the everyday mortal.

When she spoke, her low, cultured voice raced in the desperate manner of one who is anxious to know the worst, and to know it with the least delay.

"I don't suppose you'll remember me, Dr. Morgan," she said, "but I came to you some time ago—it was in September. You told me then that I hadn't six months to live. So much of my time is already gone, and I feel if there was a mistake, at all, it was in giving me too great leeway. I want your opinion again—I want you to tell me truthfully what chance I have—just how much longer I can expect to live. . . ." Her voice was brave, her carriage gallant, but on the last words the voice faltered pitifully.

The doctor looked deep into her haunted eyes. He said slowly:

"I remember. I recall you quite well. You may not remember that I asked you a good many questions, and that you answered them—if you did answer in a distraught way as if you hardly knew you were answering at all. Mechanical answers. Enough for me to understand." He nodded. "Yes, you are the girl who went on that expedition to Egypt—with the two men who died so shortly after, and there was so much talk of why they died. . . . I remembered reading in the papers all about it, and the romantic tales that were told, as soon as you told me you were Professor Ellison's daughter. You came to me that day obsessed with the fantastic notion that all those stories were real, that some ancient curse was fated to wipe out you and your whole family."

Starr's heart was suddenly beating like a trip hammer. She gripped the arms of her chair, staring at the tall, gray-haired doctor.

"But—but you told me—"

He smiled a little wryly, his eyes studying hers.

"I started to tell you," he remarked slowly, each word boring in, "that you wouldn't live another six months if you didn't shake yourself out of your morbid depression, come down to earth and realize that you were living in the Twentieth Century. Your own state of mind was killing you. Your nerves were all shot to pieces. You were so sure that you were doomed that nothing could make you believe differently. You would have known that if you could have recognized with what passion you told that weird story of yours when I managed to draw it out of you. I wanted to advise you to find some vital interest in life, something to which you could cling, some-

thing to make you forget the past, and all the terror you had seen in that Egyptian tomb. . . ." He shook his head. "What a place to take a sensitive young girl! Not, of course—" he added that quickly as he saw a flash of resentment in her eyes—"that I am in any sense criticizing your father. He merely could not understand, of course, and wished you to have the same enthusiasm for Egyptology that had given him so much pleasure during his life. That is understandable, but— Well, with him dying so shortly afterward, it certainly left you in about the most morbid state of mind I had ever seen in any young girl. I wanted to tell you so, advise you what to do, but you didn't seem to hear half of what I was saying. I hadn't even got around to prescribing a tonic when you rushed out of my office like one possessed."

(To Be Continued)

Canadians Best Arctic Fliers

Explorer Thinks They Are Well-Trained For Work

Future Antarctic expeditions will recruit their pilots in growing numbers from the ranks of Canada's hardy northland airmen, it is predicted by Alan Kenneth Innes-Taylor, famed Canadian explorer, who twice accompanied Richard E. Byrd on historic journeys to Little America.

Constant training of Canadian pilots in cold-weather flying equips them superbly for the arduous work of South Pole exploration, Innes-Taylor said in Edmonton, on his way to Juneau, Alaska, in the course of an extensive biological survey.

Forced to fend for themselves in immense wildernesses, pilots flying in northern Canada develop great resourcefulness in addition to hardihood and complete technical mastery of their machines, the explorer said. For five years Mr. Innes-Taylor was with the Royal Canadian Mounted Police stationed on the Western Arctic.

Innes-Taylor, who along with several other members of the last Byrd expedition, will receive shortly the coveted Congressional Medal of Honor for conspicuous contribution toward scientific knowledge of the earth's far places, spoke enthusiastically of the disinterested scientific motive which he said impels Byrd and similar men to carry out their arduous explorations.

"My own salary as a member of the last expedition, 1933 to 1935, was \$1 a year," he said.

A Non-Magnetic Ship

Vessel For Scientists Will Carry Very Sensitive Instruments

For the study of sea phenomena the most expensive ship of her size ever built is taking on equipment in a corner of the East India Dock, London. The Research, as she will be called, will be only 650 tons, but will cost nearly \$500,000. She will sail the oceans with a crew of scientists who will investigate magnetic phenomena. The Research will be entirely non-magnetic, so that nothing will disturb the sensitive instruments on board. The hull is mainly of teak, with brass and bronze in place of iron and steel. The ship has bronze and other non-magnetic alloys. Even the cooking stoves will be of bronze, the buttons on the sailors' clothes and the rivets in their boots will be of bone or wood, and the cutlery will be non-magnetic.

Questions Old Beliefs

Director Of Royal Ontario Museum Asks For Verification

Lecturing on "Un-natural History," Prof. J. R. Dymond, director of the Royal Ontario Museum, said that among the "stories" he would like substantiated are the following:

- That the opossum plays dead.
- That the one aim of the bat is to get in somebody's hair.
- That warts come from handling toads.
- That horse-hair could turn into snakes.
- That the mother snake protects its young by swallowing them.

Irrigation engineering was understood and practiced by the ancient Babylonians more than 5,000 years ago.

Candy is popular in London. New confectionery stores open there at the rate of one a day. 2191

TO EASE SORE THROAT PAINS QUICK

1 Crush 3 "Aspirin" tablets in 15 glass of water.

2 Gargle twice. This eases soreness almost instantly.

3 Take 2 "Aspirin" tablets with full glass of water.

As soon as you feel yourself catching cold, follow this modern treatment. Your doctor, we know, will endorse it. This medicinal gargle will provide almost instant relief from rawness and soreness. The "Aspirin" you take internally will act to combat fever, cold pains and the cold itself. "Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

Little Helps For This Week

The Lord preserveth the simple. Psalm 116:6

Thy home is with the humble, Lord;
The simple are Thy rest;
Thy lodging is in childlike hearts;
Thou makest there Thy nest.

Deliverance of the soul from all useless and selfish cares brings it to an unspeakable peace and freedom, and this is true simplicity. The soul which knows no self-seeking, no interested ends, is thoroughly candid. It goes straight forward without hindrance, its path opens more and more to "perfect day" in proportion to the increase of its self-forgetfulness and self-renunciation, and its peace amid whatsoever troubles beset it will be as boundless as the depths of the sea.

A Girl Silversmith

Takes Up Hobby To Pay Her Way Through College

Helen Stevenson, freshman at Westminster college, New Wilmington, Pennsylvania, is making enough money to help pay her way through school on an unusual hobby—silver-smithing. The only drawback, she said, is that "I hate to sell anything I make."

She has her own studio in the college art department. Working a few hours daily at odd times, she estimates she can make from 30 to 40 rings, bracelets and pins in a year. The designs are her own.

HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincarnis, the great tonic that has won over 20,000 recommendations from medical men. There's health for you in Wincarnis—new vigor, new resistance to illness.

Wincarnis is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 2½ lbs. of grapes added to the strengthening elements of beef and guaranteed malt extract.

These elements in Wincarnis help to restore lost energy quickly. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon years will drop from your shoulders.

To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, paleness and debility, take Wincarnis. At all druggists—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

25th Wedding Anniversary.

About fifty friends and relatives assembled at the home of Mr. and Mrs. Edward Liesemer on Friday, March 12th to celebrate their silver wedding.

The table was centred with a Bride's Cake and set with tapers. The decorations were pink with streamers and wedding bells.

The program opened by singing of hymns, after which the chairman Rev. A. S. Caughell, gave a short but appropriate address. Mrs. Lloyd Hehn presented Mr. and Mrs. Liesemer with a silver tea service from friends, also with a silver cake plate from Lorne and Wilma. A touch of humor was added to the presentation by first handing Mrs. Liesemer a parcel containing a flat iron, wooden spoon and rolling pin.

Vocal solos were rendered by Mrs. Caughell, Miss Dorothy Hehn and Mr. G. Liesemer; a trio by Mr. and Mrs. Hehn and Dorothy; and two numbers by a male quartette consisting of Messrs. J. V. Berscht, H. M. Reiber, H. Gabel and George Liesemer. Miss Joan Berscht rendered a piano solo.

A mock wedding with Dorothy Tuggle and Gerald Boettger as bride and groom, and Ezra Dipple as minister, followed. Comic readings were rendered by Mrs. I. Wigglesworth and Mr. L. Hehn. Games for the evening were presided over by Mr. E. N. Boettger.

Dainty and sumptuous refreshments were served after which the friends wished Mr. and Mrs. Liesemer many more happy anniversaries and repaired to their homes.

Why wear poor Work Boots—when you can buy a GOOD pair for \$2.25 at T. E. Scott's.

M.B.C. Church Annual Conference

The 31st Annual Conference of the M.B.C. Church will convene in Didsbury during the week of March 23-29.

The conference will open on Tuesday at 10 a.m. with a ministerial convention and continuing throughout the day. Missionary service in the evening. The remainder of the week will be occupied with the following:

Wednesday evening, Evangelistic Service.

Thursday evening, Night of Song.

Friday evening, Senior Night. Sunday, Morning Service at 10:30 p.m. Baccalaureate Service. Evangelistic Service in the evening.

Monday evening, March 29th, Commencement service of the Mountain View Bible School. Address by Rev. H. D. Marr.

Throughout the week the evening services commence at 8. Friends are invited to attend the conference sessions and the public services, which will be of interest to all.
